SUMMARY

Software Developer with 1.5+ years of production experience building search infrastructure, event-driven systems, and LLM-powered workflows at a B2B SaaS company serving enterprise clients (ICICI Bank,FlyDeal,Tata). End-to-end feature owner across backend services, real-time dashboards, and agentic AI systems. Strengths: Node.js, Python, Elasticsearch, RabbitMQ, and production LLM agent design.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C++, HTML, CSS

Backend & Frontend: Node.js, Express.js, React.js, Vue.js, Next.js, REST APIs, Microservices, Event-driven architecture

Data & Infrastructure: MongoDB, PostgreSQL, Elasticsearch, Redis, RabbitMQ, Docker, AWS (EC2, S3), Linux/Bash, Git

AI / LLM: Claude API, OpenAI API, Google Gemini, Claude Code, prompt design and agentic workflows in production

EXPERIENCE

Software Developer — *Jul 2025 - Present*

Provakil Technologies, Pune

- Engineered an **Elasticsearch search service** across 500K+ legal documents, cutting query latency from minutes to sub-second for 15K+ daily users.
- Architected a **hybrid Elasticsearch + LLM data-onboarding pipeline** over a 30M+ case dataset; cut 2-week, 120K-row onboardings to ~6 hours.
- Built an **LLM-powered document template engine** parsing 40+ client templates and mapping fields to account configs, collapsing week-long setups to 1 day.
- Designed a **Claude-based agentic workflow** for automated code review and autonomous resolution of small debug tickets, reducing developer context switching.
- Built a **React.js real-time analytics dashboard** (Elasticsearch backend) for 7K+ users, cutting manual reporting by ~90%.
- Owned the **Vue.js internal platform** for scheduling, access control, and plan management. Handled 30+ production incidents and mentored 2 interns.

Software Developer Intern — *Jan 2025 - Jun 2025*

Provakil Technologies, Pune

- Designed a **WhatsApp notification microservice** processing 100K+ monthly messages with RabbitMQ dead-letter queues, retries, and idempotent handlers for effectively-once delivery across 12+ templates.
- Built a **unified document storage service** abstracting MinIO and AWS S3; migrated high-volume clients to S3, cutting upload error rate from ~1% to ~0.01%.
- Managed **on-premise Docker deployments** for enterprise clients on isolated infrastructure, configuring per-client environments and debugging remotely and on-site.
- Shipped full-stack features across React.js (client product) and Vue.js (internal tooling) serving 1K+ daily users.

React Developer Intern — *May 2024 - Jul 2024*

Celebal Technologies, Jaipur

- Built reusable React components with Context API and useReducer state patterns across 5+ interconnected modules.
- Integrated REST APIs via Axios with custom hooks for loading, error, and retry handling.

PROJECTS

AI Stock Research & Finance Platform | React, TypeScript,, FastAPI, PostgreSQL, LangGraph | https://fintelligence-io.vercel.app

- Built a **multi-agent AI research engine** using LangGraph orchestrating 4 specialized agents (News, Financials, Sentiment, Thesis) for stock analysis via GPT-4o, delivering results in ~25 seconds.
- Integrated **Setu Open Banking API** for read-only account aggregation across 10,000+ banks for real-time transaction insights.
- Developed a **real-time market dashboard** with live P&L tracking, OHLC candlestick charts, and price alerts using Upstox API with SSE streaming.
- Designed **microservices architecture**: React/TypeScript frontend, Node.js + FastAPI backends, PostgreSQL with Prisma, Stripe billing, webhook-driven data sync, and background cron jobs.

Wealth Tracker | Next.js 15, React, PostgreSQL, Prisma, Gemini | https://wealthtracker-io.vercel.app

- Built a full-stack AI finance app with **15+ REST APIs** featuring rate limiting and query-optimized pagination at 200ms p98.
- Integrated **Gemini OCR** for parsing and automatic receipt categorization; monthly reports and budget alerts via crons.

EDUCATION

B.Tech in Computer Science, The LNM Institute of Information Technology (LNMIIT), Jaipur — *Aug 2021 - Jun 2025*

Relevant coursework: Data Structures & Algorithms, Operating Systems, DBMS, Software Engineering, Computer Networks
